### Recommendations

#### ***Sustaining and Growing Community Support for PSH***

To ensure sustained political will and commitment of resources, we recommend that local stakeholders:

- Focus on emerging political leadership, particularly with new elected officials to ensure sustained political will and to encourage continued and increased investment in PSH.
- Mitigate the effects of the loss of development resources and sequestration, which has frozen many voucher commitments for the Initiative and could adversely affect service commitments.
- Engage new and diverse funders to ensure sustainability of the Funders Collaborative.

#### ***Data Collection***

To ensure consistent, readily available data for the Initiative, we recommend that local stakeholders:

- Create an accurate, shared PSH inventory that can be easily maintained.
- Identify strategies to refine chronic homelessness count to support efforts to prioritize chronically homeless individuals for PSH.
- Use HMIS to track PSH placements and match the placements with information about people who are chronically homeless to validate that those prioritized for PSH are being placed first.
- Explore opportunities to deploy the Standards of Excellence to measure project and system performance in a way that streamlines provider tracking and reporting activities.

#### ***System Performance***

To expand and strengthen the impact of efforts to end chronic homelessness, we recommend that local stakeholders:

- Institutionalize streamlined practices for issuance and lease-up of Housing Choice Vouchers, including landlord outreach, move-in assistance, and housing placement strategies.
- Foster the development of transition support programs to help clients in PSH to consider their next steps and transition smoothly into other permanent housing when ready.
- Increase accessibility and prioritization of PSH to people who are chronically homeless, including strategies to take coordinated entry to scale for the system-wide PSH inventory.
- Sustain or increase focus on preventing chronic homelessness, including greater investment in prevention strategies, greater system coordination focused on this population, and research to identify and target those at greatest risk of becoming chronically homeless.
- Identify new and preserve existing resources to invest in the Initiative, most specifically in the creation of new PSH.
- Strengthen the capacity of housing and service providers to develop and target PSH effectively throughout the County, but particularly in areas with high levels of chronic homelessness.
- Strengthen the capacity of existing PSH providers to provide services to the more vulnerable individuals being targeted through increased prioritization and to expand tenant access to health resources.
